Financial Summary

The Group's consolidated net profit in Q3 2024 was EUR 34.7 million, having decreased by EUR 3.9 million compared to Q2 2024 and by EUR 4.8 million compared to Q3 2023. The profit for the Group's shareholders was EUR 34.4 million in Q3 2024, which was EUR 3.9 million less than in Q2 2024. Net profit for 9 months 2024 compared to 2023 has increased by EUR 5.9 million.

The Group's consolidated net income in Q3 2024 amounted to EUR 84.9 million, having decreased by EUR 2.4 million compared to Q2 2024 and increased by EUR 3.4 million compared to Q3 2023.

The Group's net interest income decreased by 4% in Q3 2024 compared to Q2 2024, amounting to EUR 67.4 million (EUR 70.4 million in Q2 2024). The Group's net interest income grew by 1% compared to Q3 2023.

Net service fee income remained the same, amounting to EUR 16.3 million (EUR 16.3 million in Q2 2024). The Group's net interest income grew by 20% compared to Q3 2023. In total, the Group's net income decreased by 2.7% in Q3 2024 compared to Q2 2024, amounting to EUR 84.9 million (EUR 87.3 million in Q2 2024).

Operating expenses amounted to EUR 37.2 million in Q3, having decreased by EUR 0.3 million compared to Q2 2024 and grown by EUR 4.4 million compared to Q3 2023.

The Group's Q3 operating profit was EUR 47.7 million (EUR 49.7 million in Q2 2024). Write-downs amounted to EUR 7.3 million in Q3 (EUR 5.0 million in Q2 2024).

Income tax expense on future disbursements of dividends by subsidiaries at the consolidated level was EUR 0.4 million in Q3.

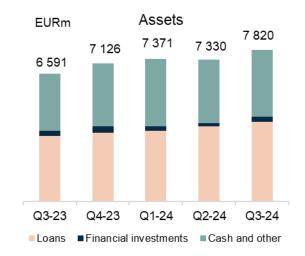

The Group's Q3 net profit was EUR 34.7 million (EUR 38.6 million in Q2 2024).

The return on equity owned by LHV's shareholders was 22.4% in Q3 2024, which was 3.4 percentage points lower than in Q2 2024 (25.8%) and 9.2 percentage points lower than in Q3 2023 (31.6%).

The Group's loan volume grew to EUR 4 126 million by the end of Q3 (EUR 3 891 million in Q2 2024), having grown by 6% or EUR 236 million in a quarter (a growth of EUR 246 million in Q2 2024). Compared to Q3 2023, the Group's loan volume has grown by 22%.

The volume of deposits increased by EUR 502 million in a quarter (an increase of EUR 150 million in Q2 2024). The volume of

deposits of clients who are financial intermediaries grew by EUR 79.8 million. The volume of deposits of ordinary clients increased by EUR 174.8 million and the volume of platform deposits decreased by EUR 247.8 million. Of the deposits, EUR 3 785 million (EUR 3 660 million in Q2 2024) were call deposits, EUR 1 646 million (EUR 1,517 million in Q2) term deposits and EUR 855 million (EUR 607 million in Q2) platform deposits.

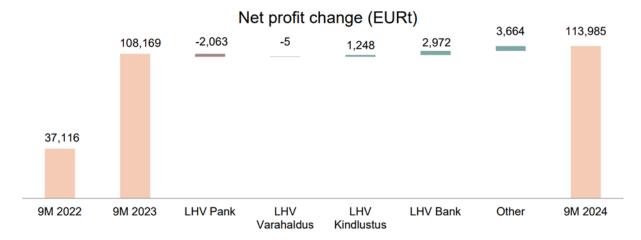

By business units, AS LHV Pank's consolidated net profit amounted to EUR 34.1 million in Q3 and that of AS LHV Varahaldus amounted to EUR 0.6 million. AS LHV Kindlustus earned a net profit of EUR 0.5 million. The net profit of LHV Bank was EUR 0.6 million. The net profit of LHV Paytech was EUR 0.2 million. Viewed separately, LHV Group made a net profit of EUR 0.1 million.

Management emphasized better-than-expected performance in business volumes and profitability, with net profit exceeding financial plans and better than results in last year. Therefore, LHV Grupp updated the financial plan for 2024 in September, increasing the profitability goals by a third. We expect that all business lines will fulfill their 2024. financial targets.

LHV Management has acknowledged the importance of maintaining quality in the loan portfolio amidst rapid growth, especially in negatiive GDP growth environment. This is the largest factor generating volatility in profitability.

The Bank's net profit at the consolidated level was EUR 34.1 million in Q3 2024, which is EUR 0.7 million less than the result in the previous quarter (EUR 34.8 million in Q2 2024) and EUR 1.9 million less than the net profit of Q3 2023. The number of the Bank's clients grew by 11,200 during the quarter (5,400 in Q2 2024) and the total number of the Bank's clients is 445,000.

The Bank's loan portfolio grew by EUR 160 million in Q3 (EUR 194 million in Q2 2024), reaching EUR 3,904 million.

The deposits of the Bank's clients increased by EUR 257 million in Q3, while the balance of the deposits of payment intermediaries increased by EUR 52 million, platform deposits grew by EUR 92 million, and the deposits of the remaining clients grew by EUR 113 million. The total volume of deposits was EUR 5,716 million at the end of Q3.

As at the end of Q3 2024, the net loan portfolio of LHV Bank amounted to EUR 223 million and the volume of deposits was EUR 635 million. The net loss of LHV Bank was EUR 0.6 million in Q3 2024 (a profit of EUR 0.9 million in Q2 2024). The net income of LHV Bank was EUR 9.4 million in Q3 2024 (EUR 12.0 million in Q2 2024).

The net profit of LHV Varahaldus was EUR 0.6 million in Q3 2024 (EUR 0.7 million in Q2 2024). The service fee income of LHV Varahaldus amounted to EUR 2.3 million (EUR 2.2 million in Q2 2024). The operating expenses of LHV Varahaldus were EUR 1.5 million in Q3 2024 (EUR 1.4 million in Q2 2024). Expenses related

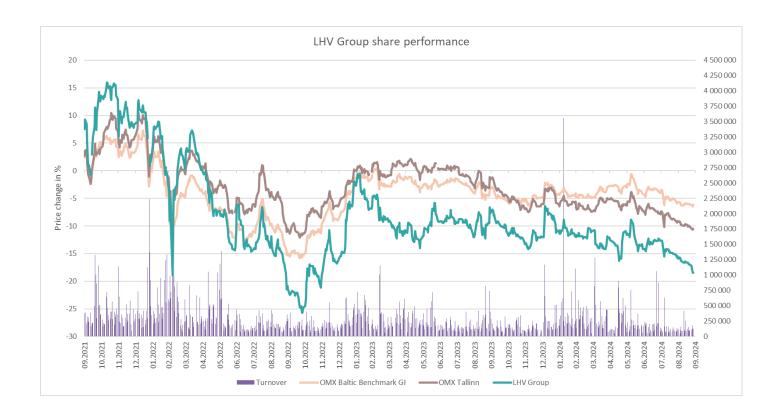

to non-current assets (including depreciation on client agreements) were EUR 0.3 million in Q3 2024 (EUR 0.3 million in Q2 2024).

The total volume of funds managed by LHV decreased by EUR 8 million in a quarter (a decrease of EUR 11 million in Q2 2024). The number of active 2nd pillar clients decreased by 2,400 in a quarter (a decrease of 1,600 in Q2 2024).

The net profit of LHV Kindlustus was EUR 0.5 million in Q3 2024 (EUR 0.4 million in Q2 2024). The volume of premiums from concluded contracts decreased by EUR 0.5 million in the quarter, reaching EUR 8.5 million. The result of the insurance activities of LHV Kindlustus was EUR 0.3 million, having decreased by EUR 0.1 million in a quarter.

There is only one class of shares issued by LHV, each share gives 1 voting right. The shares of LHV Group is traded on NASDAQ Tallinn main list since May 2016. Graph below presents LHV Group share performance against OMX Tallinn index and OMX Baltics benchmark index over last three years. The performance of the LHV Group share has fallen short of both indices, falling by 18.95% in three years, while the reference indices fell by 10.78% and 6.39 %, respectively. LHV Group share price has been 3.23 euros in the end of year and based on the stock price, LHV's market value was EUR 1 047 million.

Explanations to ratios (quarterly ratios have been expressed on an annualised basis)

Average equity (attributable to owners of the parent) = (equity as at the end of the reporting period + equity as at the end of the previous reporting period) / 2
Return on equity (ROE) = net profit for the quarter (share of owners of the parent) / average equity (attributable to owners of the parent) *100

Return on assets (ROA) = net profit for the quarter (share of owners of the parent) / average assets *100

Net interest margin (NIM) = net interest income / interest-bearing assets, average *100 $\,$

 $\label{eq:price_price} \textit{Price} \ \textit{spread} \ (\textit{SPREAD}) = \textit{interest} \ \textit{yield} \ \textit{from} \ \textit{interest-bearing} \ \textit{assets} - \textit{cost} \ \textit{of} \ \textit{external} \ \textit{capital}$

Interest yield from interest-bearing assets = interest income / interest-bearing assets, average $^{*}100$

Cost of external capital = interest expenses / interest-bearing liabilities, average *100

Cost/income ratio = total operating cost / total income *100

Operating Environment

In Q3 of 2024, the world's economy remained stable and inflation continued to slow toward the 2% target level. Monetary easing through interest rate cuts had an impact on more economic regions (such as the US and the UK). The continuing growth of real wages supports household incomes, yet in many countries purchasing power has not returned to pre-pandemic levels. Economic activity, which was stable early in the year, slipped to the lowest level of the last 8 months by the end of Q3, mainly due to a drop in manufacturing output.1 On the other hand, activity continued to grow in the service sector, albeit at a slower pace. The outlook of the industrial sector as to the growth rate of output and new orders fell throughout the quarter, foremost in the Eurozone, Canada and China. At the same time, economic growth remained stable in the US; Japan, UK and Brazil. By the end of September, signs of slowing economic growth apparent in Q3, coupled with geopolitical tensions, pushed business confidence to the lowest level of the last two years.

Risks to global outlook are generally balanced yet are still very much present. Geopolitical tensions, including from the war in Ukraine and Gaza-Israel war, may lead to a new rise in the prices of energy (oil, electricity natural gas) and certain foodstuffs (olive oil, sugar). Secondly, the persistent strength of the labour market allows the price growth in the services to be maintained at a level higher than desired. These factors contribute their share of uncertainty to the scale and speed of subsequent interest rate cuts by central banks. Global economic growth will nevertheless remain modest in years to come, since fiscal policy measures are being tightened, taxes are raised and government sector spending is being reined in. Economic growth is forecast to be 3.2% in 2024-252.

The US economy grew 3% in Q2 of 2024 and economic growth for the year is expected to be 2.6%, but slowing to 1.6% is expected for 20253. With inflation decreasing, the Federal Reserve cut interest rates by 0.5 percentage point in September and further cuts are expected. The Chinese economy grew 0.4 percentage point less than expected - 4.7% - in Q2. Despite the recently announced aid package, Chinese economic growth will slow to 4.9% in 2024 and to 4.5% in 2025, since consumer demand is still muted and a deep correction continues in the real estate sector. India, however; is expected to see a continuation of strong growth in internal demand and economic growth in 2024-25 is expected to be 6.7% and 2025-26, 6.8%.1

The performance of the world's largest stock indexes in Q3 was characterized by high volatility. S&P 500 set a new record in mid-July then in early August retreated 8.5% from the high-water mark. By the guarter's end, the index had set another record and overall quarterly growth was 5.5%. Tokyo's Nikkei 225 started the quarter with strong growth but then suffered a steep drop in August (including -12.4% in a single day), followed by a return to growth, but finished the guarter down 4.2%. Europe's STOXX 600 was stable in July, then also declined in August (-2.2% in one day), then started rising again with the result for the quarter a net positive 2.2%. London's FTSE 100 made lateral strides for most of the quarter, then also fell in August (-2% in a single day) but ended the quarter positive by 0.9%. The Shanghai SSE Composite Index fell nearly the entire Q3 but saw rapid growth at the end of the September and closed out the quarter up 12.4%. The steep growth of Chinese stock markets stemmed from planned economic stimulus package from the government but by the start of Q4, it had given up some of the ground.

Economic growth in the EU was 0.8% in Q2 of 2024. Compared to previous quarters, growth sped up slightly. Growth in the Eurozone also stayed low, at 0.6% year over year. The trends between countries remain quite different and some are still in recession (Germany, Austria and Finland). The Eurozone economy is still hampered by low consumer confidence, the aftereffects of high energy prices and weakness of investments and interest-rate-sensitive businesses. At the end of Q3, difficulties spread to manufacturing, above all in Germany. Expected output volumes and number of orders received fell to the lowest point since January and this causes concern about the outlook for the Eurozone. Private sector output in France began diminishing in

September again.4 The labour market in the Eurozone has remained strong overall and unemployment level is at a record low, 6.4%. Inflation fell in Q3 and in September hit 1.8%, below the central bank's target. At the same time, temporary acceleration of inflation is expected in Q4 due to the low comparison base in energy prices before the inflation target is reached by the end of 2025.

The latest forecast from the European Central Bank is that economic growth in the Eurozone will continue but at a lower than expected level. Growth outlook is lower since consumer spending and corporate investment have proven weaker than expected. Real wages are continuing to grow, which increases consumer confidence and, as expected, drives internal demand. Eurozone economic growth is forecasted to be 0.8% in 2024 and 1.3% in 2025.5

The European Central Bank (EKP) has cut interest rates twice so far: 0.25 percentage point in June and September. On the backdrop of the changes, the 6-month Euribor fell more steeply than expected, reaching 3.105% in late September. The ECB will probably continue cutting interest rates, but the timing and extent are based on the outlook for the inflation and monetary policy transmission. Financial markets are expecting two more 0.25-percentage-point cuts this year.

The UK economy grew 0.7% year-over-year in Q2 and annual GDP growth was 0.9% in July and 1% in August. Similarly to the Eurozone, UK growth is driven by the service sector but output continues to decline in manufacturing and construction. Some signs of improvement could be seen in consumer spending in Q3. Inflation rose back to 2.2% in August after falling to 2% in May and June.6 With inflation having approached the target, the Bank

of England lowered the prime interest rate by 0.25 percentage point in August. Further interest rate decisions will be based on inflation outlook and the strength of monetary policy transmission, but financial markets await the next cut in November 2024. Unemployment dropped to 4.1% in July and the number of job openings also decreased. The workforce participation rate grew slightly but remains lower than a year ago. The outlook for the British economy has improved in recent months and it is expected to grow 1.1% this year and 1.3% in 2025.7

Estonia's main trading partners' economies trended in opposite directions in Q3. Scandinavian countries contended with low foreign demand (including export to Germany) and this also posed challenges for Estonian are as an indirect effect. The Finnish economy shrank by 1.5% in Q2 in 2024, above all due to low consumer spending and investment. The Bank of Finland forecasts 0.5% growth in 2024 and 1.1% in 2025, but recovery will be slow.8 The Swedish economy and labour market are still dogged by weakness, while the economy grew 0.6% year-overyear in Q2, it contracted 0.3% quarter-over-quarter. Economic recovery is progressing a little slower than expected and unemployment stubbornly remains a high 8.3%. GDP growth is expected to be 0.8% in 2024 and 1.9% in 2025. Due to the weak outlook and lower inflationary pressure, the Swedish central bank continued lowering interest rates to 3.25% and the next cuts are expected in November and December9. The situation in the Lithuanian economy has improved, with 1.3% year-over-year growth in Q2 in 2024. The stronger than expected recovery of consumer spending and gradual improvement of export markets leads the Lithuanian central bank to call for higher economic

growth: 2.2% in 2024 and 3.1% in 2025.10 At the same time, economic growth in Latvia continues to hover around 0%. In Q1, the economy grew but in Q2 contraction was -0.1%. The Latvian central bank lowered its growth forecast by 1.2 percentage points to 0.6% in 2024 and 2.6% in 2025 due to a weaker than expected first half-year and a significant revision of economic figures 11.

The Estonian economy shrank 1.3% in Q2 of 2023, but reached zero growth quarter-over-quarter. Trade has declined since March 2023 and remains weak. The 12-month sliding average annual growth in trade in August was -12.8%, the monthly year-over-year growth was -1.1% and the speed of the decline has slowed to the lowest level in the past year. Weak export also keeps production volumes in decline and the speed of the decline rose in the Q3 to the same level seen in the beginning of the year (-6% in August). The difficulties can be expected to be felt in manufacturing in future after a lag time. Sales volumes in retail continue to decline, but not as fast in recent months (-3.8% in August). Confidence is still at historical lows but has improved somewhat in manufacturing. Still, consumer and retail and construction companies' confidence slipped in Q3 back to the same level seen at the start of the year. Tax hikes played a role in this process, as they exert a negative impact on purchasing power and consumer spending.

Estonia's workforce market is in good health, and the saving grace has been the retention of employees on the payroll at businesses. Unemployment fell to 7.6% in Q2 of 2024 and the Bank of Estonia is predicting that level to be the average for 2024. The number of employees has fallen the most in construction, real estate, manufacturing and water supply fields of activity. Wage growth rate has begun to melt quicker, down to 7.2% in Q2. Due to tax increases, the recovery of purchasing power will be deferred an additional year compared to expectations, pushed back to 2026. Consumer prices increased 3.2% in Q3, which is higher than the previous quarter. The growth in the prices of services continues high and the prices of foodstuffs have started rising but will probably stabilize going forward. The Bank of Estonia forecasts the average inflation to be 3.5% for 2024 and 3.9% in 2025, due mainly to the tax hikes and state-regulated prices.12 Foreign price pressure will also gain strength because after a year of decline, import prices have returned to growth.

The housing price index increased 6.7% year-over-year in Q2. Apartment prices rose 2.9% compared to Q1 of 2024; houses, 2.4%. The monetary volume of transactions was lower in H1 of 2024 than in the same period in the past three years. At the same time, the supply of apartments remained high and the sales were slow. Transaction volumes were even lower than in H1 of 2020 at the start of the pandemic.

The financial state and savings capacity of domestic households has gradually started to improve, but recovery will take time. Annual growth in deposits of households was 8.7% in August and that of companies was 1.6%. Nevertheless, the growth rate is clearly under the long-term level and growth is not broad-based. In August, the average interest rate on term deposits fell to 3.54% for households and 3.51% for businesses. In the context of sputtering economic activity, loan activity has remained strong. The annual growth of businesses' loan portfolio as of the end of August was 7.2%; the corresponding indicator for households was 6.6%. The growth in businesses, loan portfolio has had a slight acceleration in recent months. Long-term loans taken by energy and real estate companies and retailers are responsible for the growth. The industrial sector's loan portfolio has also had gradually increasing month-over-month since spring. The average interest rate on home loans has dropped to 5% due to the lower 6-month Euribor, and the figure is 6.1% for long-term business loans. While the fraught economic situation has increased banks' risk assessments, the trend has been counterbalanced by increase in pressure from the competition and the fact that companies and households have thus far managed repayment of loans well. Home loans more than 60 days in arrears make up just 0.17% of the loan portfolio, 0.25% in the case of companies. The share of consumer loans in arrears is up slightly as of Q3, but still at a low 3.2%.

Two years into a recession in Estonia, the conditions for economic recovery are better. Prices of energy and other goods are down, inflation is lower and people's purchasing power in Estonia and the rest of Europe is gradually improving. Estonian businesses are making efforts to become more competitive. The recently established tax hikes and budget cuts will curb the stimulus effect and thus rapid growth of demand is not expected on either internal or external markets. Gradual increase in foreign demand (e.g. Scandinavia) can be expected in the second half of 2025, but

consumer spending growth will remain weak in 2025 or even on par with 2024, since the recovery of purchasing power is slow. The Bank of Estonia is forecasting -0.4% economic growth in 2024, 1.9% in 2025 and 3.0% in 2026.

The Group's Liquidity, Capitalisation and Asset Quality

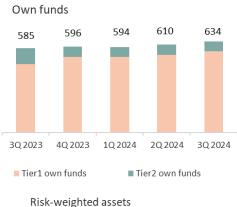

As at 30 September 2024, the Group's own funds stood at EUR 634.3 million (31 December 2023: EUR 596.4 million). LHV Group own funds are calculated based on regulative requirements.

Compared to Group's internal capital adequacy ratio target 19.7%, the Group is capitalised good enough as at the end of the reporting period, with the capital adequacy ratio is amounting to 21.0% (31 December 2023: 23.5%). In addition to total capital adequacy targets the Group has also set internal targets for the core Tier 1 capital adequacy ratio to 14.70% and Tier 1 capital adequacy ratio to 16.85%. The internal targets were approved in December 2023 by the Group's Supervisory Board, after the completion of the annual supervisory assessment by the ECB. LHV Group includes only that part of the current year's profit for which the European Central Bank has given permission as part of its own funds. Obtaining the permit is done with the referrer, but it is also applied to the reporting quarter afterwards, which is why the capitalization ratios also change, and the Group reflects them in the next report.

The minimum requirement for own funds and eligible liabilities (MREL) is a building block of the resolution plan and LHV has to maintain sufficient own funds and qualifying liabilities which can be used to cover losses in resolution planning. On 21st of June 2021 Estonian FSA set two separate MREL ratios on the consolidation group level for LHV Group. MREL-TREA is calculated based on total risk weighted assets. MREL-LRE is calculated based on total assets. Each year regulator reviews the targets and recalibrates the requirements, if needed. As at the end of Q3 2024 the regulatory targets are 26.30% (MREL-TREA) and 5.91% (MREL-LRE). Group needs to meet higher MREL-TREA target to distribute dividends. This target is equal to sum of regulatory minimum requirement and combined buffer which is 32.30%. As at 30 September 2024, MREL-TREA ratio was 34.81% (31.12.2023: 35.68%) and MREL-LRE was 13.23% (31.12.2023: 12.62%).

The Group's liquidity coverage ratio (LCR), as defined by the Basel Committee, stood at 211.0% as at the end of September (31 December 2023: 194.2%).

Financial intermediates' deposits in Bank are covered 100% with liquid assets. Excluding the financial intermediates deposits the Groups LCR is 447.2% (31.12.2023: 449.9%). The Group recognises cash and bond portfolios as liquidity buffers. These accounted for 46% of the balance sheet (31 December 2023: 48%). The ratio of loans to deposits stood at 64% as at the end of the third quarter (31 December 2023: 60%). Group's maturity structure is presented in Note 5.

The credit quality of the group remained at a good level. A loan discount reserve of 42.5 million euros was formed in the balance sheet at the end of September to cover estimated loan losses. As of the end of the third quarter, the fair value of the collateral of the loan portfolio is 3% higher than the book value of the loan portfolio.

LHV Pank earned net interest income of EUR 60 million and EUR 8.7 million in net service fee income in Q3. Net financial income amounted to EUR 0.6 million in Q3. In total, the Bank's income was EUR 69.8 million and expenses were EUR 22.8 million. Net income rose by 7% and expenses increased by 11% over the year. The discounts of loans and bonds amounted to EUR 7.1 million in Q3. We made forward-looking specific and general discounts. We are keeping a very close eye on developments in the credit portfolio.

LHV Pank accounts for and recognises in expenses a 14% advance income tax which was EUR 5.5 million in Q3. Income tax expense on future disbursements of dividends by subsidiaries at the consolidated level was EUR 0.3 million in Q3.

The Bank's Q3 profit amounted to EUR 34.1 million, which is 2% less than in Q2 2024 (34.8) and 5% less than in Q3 2023 (36.0).

The strong result in Q3 was mainly impacted by higher interest rate income, due in turn to larger than planned volumes in the loan portfolio. The growth in interest income will slow since the expenses paid on deposits are growing faster. Service charge income fell short of planned levels, mainly due to profit shared with the UK bank, while expenses were as planned. Since we outperformed planned results significantly, we updated the financial plan at the end of Q3.

Income from settlements, currency exchange and investment services contribute the most into service fees.

The total volume of the Bank's loan portfolio reached EUR 3,904 million by the end of Q3 (Q2 2024: EUR 3 744 million). The volume of loans grew by EUR 160 million in Q3 (Q2 2024: a growth of EUR 194 million). The net retail loan portfolio grew by 7% during the quarter, reaching EUR 1 832 million (Q2 2024: EUR 1 719 million). The net corporate loan portfolio grew by 2% during the quarter, reaching EUR 2 072 million (Q2 2024: EUR 2 024 million).

The volume of deposits at the Bank increased by EUR 257 million from the previous quarter and stood at EUR 5 716 million at the end of the quarter (Q2 2024: EUR 5 459 million). The volume of payment intermediaries' deposits grew by EUR 52 million during the quarter. Of the deposits, EUR 3 714 million were call deposits, EUR 1 650 million term deposits and EUR 352 million platform deposits. The volume of individuals' deposits was EUR 1 699 million as at the end of the quarter, having grown by 8% since the previous quarter.

The Bank's expense-income ratio was 32.7%%n Q3, increasing by 1.4 percentage points from Q3 2023 (31.3%).

Loans to businesses grew by EUR 47 million and retail loans increased by EUR 113 million. Lending activity has remained solid despite the slumping economy. The annual growth of the business loan portfolio in Estonia was 7.2% at the end of August while domestic households' loan portfolio grew 7.6%. The growth of businesses' loan portfolio has shown signs of accelerating in recent months. We are outpacing growth on the market; our market share of new loans to businesses is close to 30%. In addition, the strong result is also due to the continuation of the home loan refinancing campaign and the general activation of the home loan market, which also keeps new applications coming in. September marked the start of the student loan issuing period.

The corporate credit portfolio, which includes loans and guarantees, grew EUR 400.9 million over the year (+21%) with a quarter-over-quarter growth of EUR 106.7 million (+5%). Loans granted to companies in the sector of real estate related activities were the largest source of growth, growing by EUR 158.3 million (+22%) in a year. Next came loans to companies in the construction sector, which grew EUR 71.5 million from the year before (+155%) and loans issued to companies in the transport and warehousing sector, which grew EUR 47.8 million (+360%) over the year.

Compared to Q2 2024, the portfolio growth was most influenced by the sector engaged in real estate activities (quarterly growth EUR 34.7 million; +4%), followed by the construction sector (EUR 28.3 million; +32%) and the administrative and support activities sector (EUR 14.7 million; +20%).

The majority of corporate loans were granted to the real estate sector, which makes up 39% of the Bank's corporate loan

portfolio. Of real estate loans, the principal part was issued to projects with high-quality rental streams, with real estate developments making up a much smaller share. Most of the financed real estate developments are located in Tallinn, while projects located in other major Estonian cities and in the vicinity of Tallinn made up about 26% of development projects. LHV's market share of new development financing in Tallinn made up about one-third by estimate at the end of Q3 2024. The LHV real estate development portfolio is well-positioned in case market trends should change – the financed developments are in good locations and the risk to planned sales price ratio averages 56%.

After the real estate sector, the largest amount of credit has been issued to companies in the power, gas, steam and conditioned air sector (9%) and to manufacturing industry companies (8%). Of sectors that usually run a higher credit risk, construction makes up 5%, transport and warehousing 3% and HoReCa 2% of the total volume of the portfolio.

During the quarter, the number of the bank's clients grew by more than 11 000. New clients were added at a solid clip and clients' activity level was high.

Ordinary clients' deposits increased by EUR 174 million during the quarter and financial intermediaries' deposits by EUR 52 million. The financial situation and savings capacity of households has started gradually improving, but recovery will take time. The annual growth of households' deposits in Estonia reached to 8.7% and corporate deposits to 1.6%. Still, the growth rate is clearly less than the long-term average and the growth is not broadbased. The goal is to attract deposits from the Estonian market, and this effort was successful in Q3, but due to faster loan portfolio growth, we also increased deposits attracted via platforms by EUR 92 million. Deposits remain in the focus.

Loan impairments grew somewhat during the quarter. The environment is still fragile and Q3 also saw model-based forward-looking impairments. In addition, impairments were also affected by changes in ratings of individual clients. There were also movements in the positive direction, which levelled the results. As a whole, the bank's loan portfolio quality has remained strong and the share of overdue loans continues to be low. We see increase in arrears in consumer loans, but the levels are reasonable and consistent with expectations.

We entered into a contract of sale with TBB Pank for part of the loan portfolio. At the time of the signing, the portfolio being purchased was EUR 36 million, which may go down to EUR 25 million. The transaction will be completed by late October.

In August, we launched a comprehensive offer aimed at apartment associations, which combines a convenient payment solution, insurance and financing at low rates for investments into energy efficiency. The offer has been very well received.

We took part in organizing a 200-million-euro Estonian government bond issue. Held in early September, it drew institutional investors and more than 7000 retail investors and was oversubscribed four times.

The internship summer, highly popular among young people, came to a close. This summer, 31 interns worked at LHV. Besides their everyday work, they attended workshops where they learned more about their strengths, the history of LHV, investing and

pensions, job-seeking and LinkedIn and Youth Bank. As part of Book Club they also read the LHV book Pangasaladus. Grouped into teams, interns presented projects for making LHV even better.

Instar's job expectations and employer reputation survey found that LHV Pank was seen as the most attractive employer among experienced employees, youth and economics students. LHV placed third among IT students.

Overview of LHV Bank Limited

In Q3, the bank continued to actively grow its business volumes. Deposits grew more than 40% during the quarter and the loan portfolio saw over 50% growth for the second quarter in a row. Deposits grew from EUR 189 million to EUR 635 million. By the end of the quarter, the bank had almost 10,000 depositors. Deposits are attracted from three deposit platforms, with interest rates adjusted on the deposits as needed to optimize the interest expenses incurred. On 1 August the Bank of England cut the reference interest rate by 0.25% to 5.00%, resulting in the bank's interest rates and financing expenses falling as well.

Loans grew by EUR 76 million to EUR 223 million during the quarter. Loans approved by the Credit Committee but yet to be issued stood at EUR 150 million at the end of the guarter. The quality of the loan portfolio was strong, and no borrowers were in arrears as of the end of the quarter. In Q3, the focus was on expanding the network of loan brokers and team-building. The bank now has partnership agreements with over 50 loan brokers. By the quarter's end, the whole team was together - loan managers and support functions in both London and Manchester.

Business volumes of payments of financial intermediary clients stayed at the same level as last quarter. The volumes of deposits, which dropped in Q2, recovered to some degree but remained lower than planned. The reason for the lower deposits was tougher competition in competitors' pricing of deposits and the fact that the bank had a more conservative risk appetite than competitors in servicing some clients.

Net profit for the quarter was EUR 0.6 million. The quarterly profitability result fell short of the target due to the slow growth in the loan portfolio in the beginning of the year; which led to slower growth of interest income, and the decrease in financial intermediaries' deposits and greater volatility, which led to lower than planned interest income. The "other expenses" outperformed expectations due to the introduction of the mobile bank for retail banking clients. A few major one-time expenses also occurred in Q3. Overall, "other expenses" at the nine-month mark were less than last year in the same period.

Work continued on developing the new retail banking services, mobile bank and website. In early October, the mobile bank was opened for LHV staff for testing, the first accounts were opened and the first payments made. The public opening of the mobile bank will take place a few months from now depending on the results of the in-house testing. Direct debiting and cards are planned to be ready in Q1 2025.

In early July, the bank joined the SEPA system of ordinary payments. Preparations for accession proved more timeconsuming than planned and the accession window planned for December will actually be realized in April 2025.

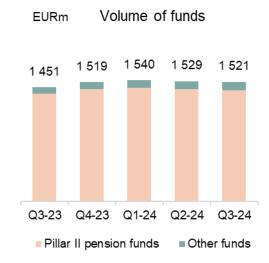

In Q3, supervisory authorities published several policy statements on the implementation of Basel 3.1 standards and the implementation date was postponed to 1 January 2026. The bank is engaged in conducting impact analysis of the new rules.

In Q3, the operating income of LHV Varahaldus amounted to EUR 2.3 million and the net profit was EUR 0.6 million. Operating income largely corresponds to what was expected at the beginning of the year, while operating expenses were influenced by one-time personnel expenses at the beginning of the quarter. Profitability has been positively influenced by a good yield of major funds that also continued in the past quarter and the resulting financial income earned from a growth in the value of own shares. The financial plan that was updated in September did not have an extensive impact on the forecasts of LHV Varahaldus.

Compared to the first half of the year, Q3 was considerably more restless in equity markets. The major equity markets ended the quarter at new peaks, but a sudden drop of a few days was seen in the markets at the beginning of both August and September, followed by a quick recovery. The long-awaited reduction of the US base interest by 50 base points also took place in Q3, but the future trend on the backdrop of a strong economy remains unclear. Measured in euros, the values of MSCI World and SP500

grew by 2.1% and 1.4%, respectively. The dollar weakened towards the euro by 3.8% during the quarter.

All LHV's pension funds showed a positive yield in the past quarter. The values of M, L and XL shares grew by 1.8%, 1.2% and 2.2%, respectively. Pension fund Roheline grew by 1.9% and the three-month yield of pension fund Indeks was 1.9%. The conservative funds S and XS rose by 2.8% and 2.5%, respectively. In the largest funds of L and XL, the yield was positively influenced mainly by investments related to precious metals, while the quarter was weaker for other listed assets contained in the portfolio, both shares and bonds.

The number of LHV's active second-pillar clients at the quarter's end was more than 116 thousand, having dropped by nearly two thousand in the three months. The drop was mainly caused by clients who left the second pillar at the beginning of September, but the sales figures have also been more modest. The rate of clients leaving the second pillar remains lower compared to previous periods, with the four-month window of applications for

leaving the second pillar that ended in July bringing a smaller-than-before number of exiting clients. The volume of assets managed by LHV Varahaldus was EUR 1,521 million by the end of the quarter. Clients also continue actively increasing the second pillar payments – by the end of September, 7,700 LHV pension fund clients had submitted the respective application.

Long-term Management Board member and fund manager of LHV Varahaldus, Joel Kukemelk left his position on 31 July and the Management Board now has two members since August. Erko Rebane with his long-standing experience became the portfolio manager responsible for index funds, and Jani Mäenpää

became the portfolio manager of pension funds Roheline and Roheline III.

The portfolio of all actively managed funds and distribution of asset classes largely correspond to the long-term goal, where M, L and XL portfolios are mainly invested in unlisted asset classes less dependent on stock markets. We keep a close eye on developments on the stock market and are prepared to quickly adjust our positions depending on the conditions. We also devote extra attention to liquidity to ensure capability to more aggressively invest and naturally make disbursements to customers if they change or exit funds.

Overview of AS LHV Kindlustus

The Q2 2024 sales results of AS LHV Kindlustus decreased from the The Q3 2024 sales results of AS LHV Kindlustus decreased from the previous quarter, largely due to competitors' price changes and the seasonal low consumer activity. Of insurance products, the results were the best in home and travel insurance - the sales figures of both products have exceeded the financial plan throughout 2024. The results of all-risks and motor TPL were largely influenced by competitors whose price changes reduced LHV's sales volumes a little. In August, we also applied some changes in the pricing of all-risks insurance in order to better adapt to market developments. The volume of insurance premiums from the health insurance product solution marketed in cooperation with Confido was EUR 1,709 thousand in Q3. The number of insurance contracts continues its slow but stable growth. As at the end of Q3, the company exceeded the main goals of the 2024 financial plan.

In the development of information systems, several important updates were completed in the claims adjustment programme and in the data warehouse created to improve the company's analytical capability. The development of both systems continues in Q4 2024. A great focus continues to be on improving cooperation and making processes more efficient with other LHV Group companies. The improvement and updating of several insurance terms and conditions commenced in Q3. All the amendments to the terms and conditions will be approved by the Management Board of the company and will enter into force at the beginning of Q4 2024.

As at 30 September 2024, LHV Kindlustus had 245 thousand valid insurance contracts and 169 thousand clients. Both indicators grew from the previous quarter.

The volume of gross insurance premiums was EUR 8,452 thousand and the net earned insurance premiums totalled EUR 7,985 thousand in Q3. The proportions of the products in the insurance portfolio remained the same as in the previous quarter.

During Q3, 24,729 new loss events were registered, and claims adjustment was completed in the case of 24,753 incidents. As at the end of the quarter, a total of 2,818 claim files were open. The net losses incurred in the period together with indirect claims adjustment costs were EUR 5,322 thousand.

The quarterly loss frequency of insurance products corresponded to the financial plan. There were a few major loss events. Of insurance products, the gross loss ratios were good in home and travel insurance. The company's profit in Q3 was EUR 452 thousand. Cumulatively, we are exceeding the 2024 profitability objectives. The volume of the company's operating expenses as at 30 September 2024 was below the planned level.

| EUR thousand | Q3 2024 | Q2 2024 | Change % | Q3 2023 | Change % |
|-------------------------------|---------|---------|----------|---------|----------|
| Gross insurance premiums | 8 452 | 8 963 | 6% | 7 525 | 19% |
| Net earned insurance premiums | 7 985 | 7 564 | -5% | 6 335 | 19% |
| Net losses incurred | -5 322 | -4 767 | -10% | -4 108 | 16% |
| Total net operating expenses | -2 304 | -2 411 | 5% | -1 930 | 25% |
| Underwriting result | 359 | 385 | 7% | 298 | 29% |
| Net profit | 452 | 428 | -5% | 299 | 43% |

As of the end of Q3, LHV Kindlustus employed 55 people.

The Notes on pages 25 to 41 are an integral part of the condensed consolidated interim financial statements

Notes to the Condensed Consolidated Interim Financial Statements

NOTE 1 Accounting Policies

The condensed consolidated interim financial statements have been prepared in accordance with IAS 34 "Interim Financial Reporting", as adopted by the European Union. The condensed consolidated interim financial statements does not contain all the information necessary to be presented in the annual report.

These condensed consolidated interim financial statements should be read in conjunction with the group's annual financial statements as at 31 December 2023. The same accounting policies and methods of computation are followed in the condensed consolidated interim financial statements as compared with the most recent annual financial statements.

There are no significant changes in risk policies of the group, all the results including estimates and judgement of expected credit losses are in line with principles described in group's annual financial statements as at 31 December 2023.

The financial figures of the condensed consolidated interim financial statements have been presented in thousands of euros,

unless otherwise indicated. The interim financial statements have been consolidated and include the results of AS LHV Group and its subsidiaries AS LHV Varahaldus (100% interest), AS LHV Pank (100% interest), LHV Bank Ltd (100% interest), AS LHV Paytech (100% interest) and AS LHV Finance (65% interest) and AS LHV Kindlustus (65% interest).

Correction in classification of investing and operating cash flows

Management identified a classification misstatement related to financial investments. Such purchased and sales have been previously classified under net cash flow from/used in investing activities but as these assets are operating activities in nature then the cash flows from purchases and sales should be classified under net cash generated from/used in operating activities. The presentation has been corrected by reclassifying the affected cash flow statement line items for the prior periods as follows:

| | Q3 2023 | Increase/(Decrease) | Q3 2023 restated |
|--|---------|---------------------|------------------|
| Administrative and other operating expenses paid Cash flow from operating activities before change in | -13 672 | -431 | -14 103 |
| operating assets and liabilities | 54 333 | -431 | 53 902 |
| Net change in debt and equity securities | 0 | 101 538 | 101 538 |
| Other liabilities | 6 513 | 431 | 6 944 |
| Net cash generated from/used in operating activities | 117 246 | 151 402 | 268 648 |
| | | | |
| Net change in debt and equity securities | 101 538 | -101 538 | 0 |
| Net cash flow from/used in investing activities | 100 163 | 101 538 | -1 375 |
| | | | |
| | 9M 2023 | Increase/(Decrease) | 9M 2023 restated |
| Administrative and other operating expenses paid Cash flow from operating activities before change in | -40 467 | -1 276 | -41 743 |
| operating assets and liabilities | 136 182 | -1 276 | 134 906 |

| Other liabilities | 34 381 | 1 276 | 35 637 |
| Net cash generated from/used in operating activities | 229 736 | 253 494 | 483 230 |
| | | | |
| Net change in debt and equity securities | 105 974 | -105 974 | 0 |
| Net cash flow from/used in investing activities | 99 177 | -105 974 | -6 797 |

NOTE 2 Business Segments

The Group divides its business activities into segments according to its legal structure, except LHV Pank divides its business activities by 3 main segments: retail banking, corporate banking and financial intermediates. Financial intermediates segment also includes the fee sharing on the basis of the cooperation agreement concluded with LHV Bank Ltd. The segments form a part of the Group, with a separate access to financial data and which are subject to regular monitoring of operating profit by the Group's decision-maker. The Management Board of AS LHV Group has been designated as the decision-maker responsible for allocation of funds and assessment of the profitability of the

business activities. The result posted by a segment includes revenue and expenditure directly related to the segment.

The revenue of a reported segment includes gains from transactions between the segments, i.e. loans granted by AS LHV Pank to other group companies. The division of interest income and fee and commission income by customer location has been presented in Notes 9 and 10. The breakdown of interest income by customer location does not include the income from current accounts, deposits and investments in securities. The Group does not have any customers, whose income would account for more than 10% of the corresponding type of revenue.

NOTE 3 Risk Management

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk,

cash flow interest rate risk and price risk), credit risk and liquidity risk. The condensed interim financial statements do not include

all financial risk management information and disclosures required in the annual financial statements; they should be read in conjunction with the group's annual financial statements as at 31 December 2023. There have been no major changes in the risk management department or in any risk management policies since the year end.

To reduce liquidity risk, LHV Pank has issued mortgage bonds and involved funds from deposit platforms.

The escalated conflict in Ukraine in early 2022, did not have direct impact to LHV credit portfolio, because of historical restrictive

lending to customers exposed to risks outside EU. However, changed environment needs to be considered, when issuing credits both to corporates and retail clients going forward.

The Estonian economy has been in recession for 3 years. So far, the cooling economy has had no significant negative impact on the credit portfolio quality. LHV is continuously monitoring credit portfolio quality and is in close dialog with customers, so that in case of a need, potential risks could be mitigated.

NOTE 7 Fair Value of Financial Assets and Liabilities

The Management Board of the Group has determined the fair value of assets and liabilities recognised at amortised cost in the balance sheet. To determine the fair value, future cash flows are discounted based on the market interest curve.

The below table provides an overview of the assessment techniques, which depend on the hierarchy of assets and liabilities measured at fair value:

| | IFRS 9 | Level | Level 2 | Level 3 | Total |
|---|-------------|--------|-----------|-----------|-----------|
| | measurement | 1 | | | |
| 30.09.2024 | | | | | |

As of September 30, 2024, the liquidity portfolio in the amount of EUR 238 098 thousand is reflected in the amortised cost and the loss from the revaluation of the portfolio is refleced in the income statement in the line Impairment losses on loans and bonds in the total amount of EUR 26 thousand. The estimated market value of the securites recorded in the amortised cost as of September 30, is EUR 238 804 thousand.

Hierarchy levels:

- Level 1 the price quoted on active market Level 2 a technique which uses market information as input (rates and interest curves of arms-length transactions)
- Level 3 other methods (e.g. discounted cash flow method) with estimations as input

As at 30.09.2024 the fair value of corporate loans and overdraft is EUR 105 406 thousand (4.46%) higher than their carrying amount (31.12.2023: 78 899 thousand, 3.90% higher). Loans are issued in the bank's business segments on market conditions. Therefore, the fair value of retail loans does not materially differ from their carrying amount as at 30 September 2024 and 31 December 2023. In determining the fair value of loans, considerable management judgements are used (discounted cash flow method with current market interest is used for the valuation). Loans issued are thus categorised under hierarchy level 3.

Lease interest rates offered to customers generally correspond to interest rates prevailing in the market for such products. Considering that the interest rate environment has been relatively stable since the Group started to provide leasing, consequently the fair value of lease agreements does not materially differ from their carrying amount. As significant management judgment is required to determine fair value, leases are classified as level 3 in the fair value hierarchy.

Leveraged loans, hire-purchase and credit cards granted to customers are of sufficiently short-term nature and they have been issued at market terms, therefore the fair market rate of interest and also the fair value of loans do not change significantly during the loan term. The fair value level of leveraged loans, hirepurchase, credit cards and consumer loans is 3 as significant judgmental assumptions are used for the valuation process.

Other receivables from customers, along with accrued expenses and other current receivables have been generated in the course of ordinary business and are subject to payment over a short period of time. Their fair value does not thus differ from the carrying amount. These receivables and payables do not bear any interest. The fair value of accounts payable, accrued expenses and other payables is determined based on hierarchy level 3.

Customer deposits with fixed interest rates are mostly short-term with the deposits priced pursuant to market conditions. The majority of the customer deposits include demand deposits. The fair value of the deposits determined via discounting future cash flows does not thus materially differ from the carrying amount. In determining the fair value of customer deposits, considerable management judgements are used. Customer deposits are thus categorised under hierarchy level 3.

Subordinated loans were issued on market terms and considering the movements in loan and interest market, we can say that the market conditions are similar as they were when issuing the subordinated loans so that the fair value of the loans does not materially differ from their carrying value. In determining the fair value of loans, considerable management judgements are used. Subordinated debt are thus categorised under hierarchy level 3.

Swaps are instruments, where the fair value is determined via the model-based approach by using the inputs available on the active market. The fair value of such non-market derivatives is calculated as a theoretical net present value (NPV), by using independent market parameters and without assuming the presence of any risks or uncertainties. The NPV is discounted by using the risk-free profitability rate available on the market.

NOTE 8 Breakdown of Loan Portfolio by Economic Sectors and by Stages

| 30.09.2024 | Stage 1 | Stage 2 | Stage 3 | Provision | Total | % |

In June 2020, LHV Pank made a successful debut issue of EUR 250 million in covered bonds to international investors. 31 institutional investors participated in the 5-year issue and the interest rate was 0.12%. The issue by LHV Pank was the first debut issue since the beginning of the COVID-19 crisis. The issue received an Aa1 rating from Moodys and was listed on the Dublin Stock Exchange. This issue was refinanced during 2024 second and third quareter in full amount.

In September 2021, LHV Group issued EUR 100 million of preferred bonds with a four-year maturity, which includes the option to call back the transaction after the third year. The issue received a Baa3 rating and was listed on the Dublin Stock Exchange.

In November 2022, LHV Group Carried out a tap issue of senior unsecured bonds with a maturity date in September 2025. As a

^{*}lump-sum payment of social, health and other insurances

result, LHV raised additional funds in the amount of EUR 88 million.

In the second quarter of 2023, MREL eligible unsubordinated bonds were issued in the amount of 18 million euros, and in the

fourth quarter, an additional issue in the amount of EUR 100 million took place.

NOTE 14 Accounts payable and other liabilities

| Financial liabilities | 30.09.2024 | 31.12.2023 |
|--|------------|------------|
| Trade payables and payables to merchants | 4 689 | 2 131 |
| Other short-term financial liabilities | 9 921 | 16 288 |
| Lease liabilities | 10 252 | 13 415 |
| Payments in transit | 46 218 | 48 632 |
| Financial guarantee contracts issued | 1 379 | 615 |
| Liabilities from insurance services | 15 449 | 47 375 |
| Subtotal | 87 908 | 128 456 |
| Not financial liabilities | | |
| Performance guarantee contracts issued | 1 939 | 1 750 |
| Tax liabilities | 11 325 | 10 630 |
| Payables to employees | 5 464 | 4 408 |
| Other short-term liabilities | 797 | 751 |
| Subtotal | 19 525 | 17 539 |
| Total | 107 433 | 145 995 |

Payables to employees consist of unpaid salaries; bonus accruals and vacation pay accrual for the reporting period and the increase in liabilities is caused by the increase in the number of employees during the year. Payments in transit consist of foreign payments

and payables to customers related to intermediation of securities transactions. All liabilities, except for financial guarantees, are payable within 12 months and are therefore recognised as current liabilities.

NOTE 15 Contingent Liabilities

| Irrevocable transactions | Performance guarantees | Financial guarantees | Letter of credit | Unused loan commitments | Total |

| Liability in the contractual amount as at 30 September 2024 | 112 864 | 61 500 | 1 412 | 558 333 | 734 109 |
| Liability in the contractual amount as at 31 December 2023 | 56 217 | 55 061 | 3 732 | 495 653 | 610 663 |

NOTE 16 Basic Earnings and Diluted Earnings Per Share

In order to calculate basic earnings per share, net profit attributable to owners of the parent has been divided by the weighted average number of shares issued. The dilution effect when calculating the Diluted earnings per share comes from the share options granted to management and key employees.

| | Q3 2024 | 9M 2024 | Q3 2023 | 9M 2023 |
|---|---------|---------|---------|---------|
| Total profit attributable to owners of the parent (EUR | | | | |
| thousand) | 34 385 | 113 215 | 39 058 | 107 065 |
| Weighted average number of shares (in thousands of units) | 324 189 | 322 011 | 319 833 | 317 629 |
| Basic earnings per share (EUR) Weighted average number of shares used for calculating the | 0.11 | 0.35 | 0.12 | 0.34 |
| diluted earnings per shares (in thousands of units) | 329 672 | 327 544 | 325 517 | 323 464 |
| Diluted earnings per share (EUR) | 0.10 | 0.35 | 0.12 | 0.33 |

NOTE 17 Capital Management

The goal of the Group's capital management is to:

- √ ensure continuity of the Group's business and ability to generate return for its shareholders;
- ✓ maintain a strong capital base supporting the development of business;
- comply with capital requirements as established by supervision authorities.

The amount of capital that the Group managed as of 30.09.2024 was 634 254 thousand euros (31.12.2023 596 357 thousand euros). The goals of the Group's capital management are set based on both the regulative requirements and additional internal buffer.

The Group follows the general principles in its capital management:

- The Group must be adequately capitalized at all times, ensuring the necessary capital to ensure economic preservation in all situations:
- The main focus of the capital management is on tier 1 own funds, because only tier 1 own funds can absorb losses. All other capital layers in use are dependent of tier 1 own funds volume;
- Capital of the Group can be divided in two: 1) regulative minimum capital and 2) capital buffer held by the Group. In order to reach its long-term economic goals the Group must on one hand strive towards proportional lowering of the regulative minimum capital (through minimizing risks and high transparency). On the other hand, the Group must strive towards sufficient and conservative capital reserve, which will ensure economic preservation even in the event of severe negative risk scenario;
- The risk appetite set by the Group is an important input to capital management planning and capital goal setting. Higher risk appetite requires marinating higher capital buffer.

| Capital base | 30.09.2024 | 31.12.2023 |
|---|------------|------------|
| Paid-in share capital | 32 419 | 31 983 |

The table provides an overview of the material balances and transactions involving related parties. All other transactions involving the close relatives and the entities related to members of the management board and supervisory board and the minority shareholders of the parent company AS LHV Group have occurred according to the overall price list. The management and shareholders with significant influence include also their related entities and persons.

Loans granted to related parties are issued at market conditions.

In Q3, salaries and other compensations paid to the management of the parent AS LHV Group and its subsidiaries totalled EUR 811 thousand (Q3 2023: EUR 693 thousand), including all taxes. As at 30.09.2024, remuneration for September and accrued holiday pay in the amount of EUR 203 thousand (31.12.2023: EUR 179 thousand) is reported as a payable to management. The Group did not have any long-term payables or commitments to the members of the Management Board and the Supervisory Board as at 30.09.2024 and 31.12.2023 (pension liabilities, termination benefits, etc.). In Q3 2024, the remuneration paid to the members

of the Group's Supervisory Board totalled EUR 30 thousand (Q3 2023: EUR 20 thousand).

Management is related to the share-based compensation plan. In Q3 2024 the share-based compensation to management amounted to EUR 589 thousand (Q3 2023: EUR 580 thousand).

The Group has signed contracts with the members of the Management Board, which do not provide for severance benefits upon termination of the contract. In any matters not regulated by the contract, the parties adhere to the procedure specified in the legislation of the Republic of Estonia.
